CESI: Who are we

1、CESI：Who are we

China Electronics Standardization Institute (CESI)

- **Founded:** 1963.
- **Affiliation:** **A public institution** directly under the Ministry of Industry and Information Technology (MIIT).
- **Role:** A foundational, public-interest, and comprehensive research institute engaged in standardization in the field of **electronic information technology.**

中国电子技术标准化研究院创建于1963年，是工业和信息化部直属事业单位，从事电子信息技术领域标准化的基础性、公益性、综合性研究。

- Hosts domestic technical secretariats for **45** IEC / ISO/IEC JTC1 TCs/SCs.
- Secretariats of **17** national TC and **24** SC.
- Partners with leading **international standardization organizations** and **renowned foreign institutions**.

承担45个IEC、ISO/IEC JTC1的TC/SC国内技术归口，以及17个全国标委会和24个分标委会秘书处工作，并与多个国际标准化组织及国外知名机构建立合作关系。

Office infrastructure in Beijing, Shanghai, Shenzhen...

02

Open Source：What have we done

1、Mulan License

Mulan Open Source License
(Regulates the use, distribution, reproduction and propagation of software, code and projects.)

Mulan PSL v2

- Maximizes openness of patents and copyrights;
- Supported by over **100,000** domestic open source projects.

最大限度鼓励专利和版权的开放；
已获**10万余**国内开源项目支持。

Mulan PubL v2

- Adds **license copyleft** on the basis of Mulan PSL v2;
- Supported by **250** domestic self-developed open source projects.

在Mulan PSL v2的基础上增加了许可证的传染性；
已获**250项**国内自主开源项目支持。

MBODL

- Formulates applicable agreements for the release of **AI training datasets**.

针对人工智能训练数据集的发布拟定适用的协议；

MulanOWL sv1

- Regulates and restricts the **reproduction, use, modification and distribution** of open works.

针对开放作品的复制、使用、修改和分发等行为进行规范和约束。

Supports the development of OpenAtom Licenses.

OpenAtom Model License

- Designed for **open source models** and their associated code, datasets in the AI field.

用于人工智能领域开源的大模型及其相关代码、数据集等形式。

OpenAtom Open Hardware License

- Regulates the licensing, modification and distribution of **hardware and supplementary materials**, covering hardware production and commercialization.

规范硬件与补充材料的许可、修改、分发，涵盖硬件生产及商业化行为。

2、Mulan Permissive Software License v2

MulanPSL-2.0 is an international open source license recognized by OSI, officially available in both Chinese and English

MulanPSL-2.0

- Grant of Copyright License（版权许可授予）；
- Grant of Patent License（专利许可授予）；
- No Trademark License（不提供商标许可）；
- The Chinese version and the English version shall have the same legal effect（中文版本与英文版本具有同等法律效力）；
- More than 100,000 open-source projects have adopted the MulanPSL-2.0（超过 10 万个开源项目采用了木兰宽松许可证第 2 版）；

OpenEuler openGauss ArkCompiler XiUOS X Industrial Ubiquitous Operating System

  http://opensource.org/licenses/MulanPSL-2.0
  http://www.apache.org/legal/resolved.html#category-a

open source THE APACHE SOFTWARE FOUNDATION

3、Mulan OSC、CCF Ubiquitous OS Open Community

We run the **Mulan Open Source Community** and **CCF Ubiquitous OS Open Community** to advance open-source technologies in AI, OS and basic software. We host **Mulan Technology Open Day, Mulan Summit, China Open Source Hackathon and CCF Innovation Competition** for technical exchanges.

Mulan OSC

Mulan Technology Open Day

Mulan Summit

China Open Source Hackathon

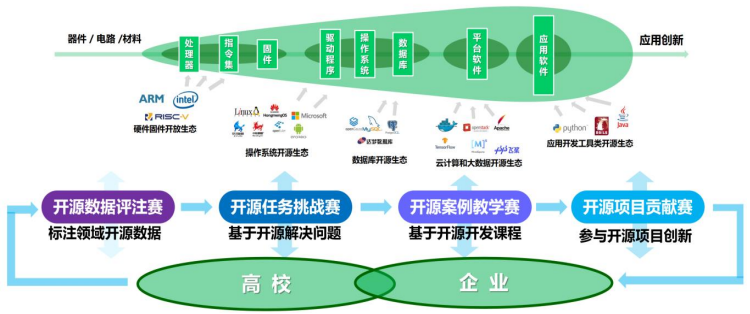

CCF Ubiquitous OS Open Community

CCF Innovation Competition

4、Open-source standards

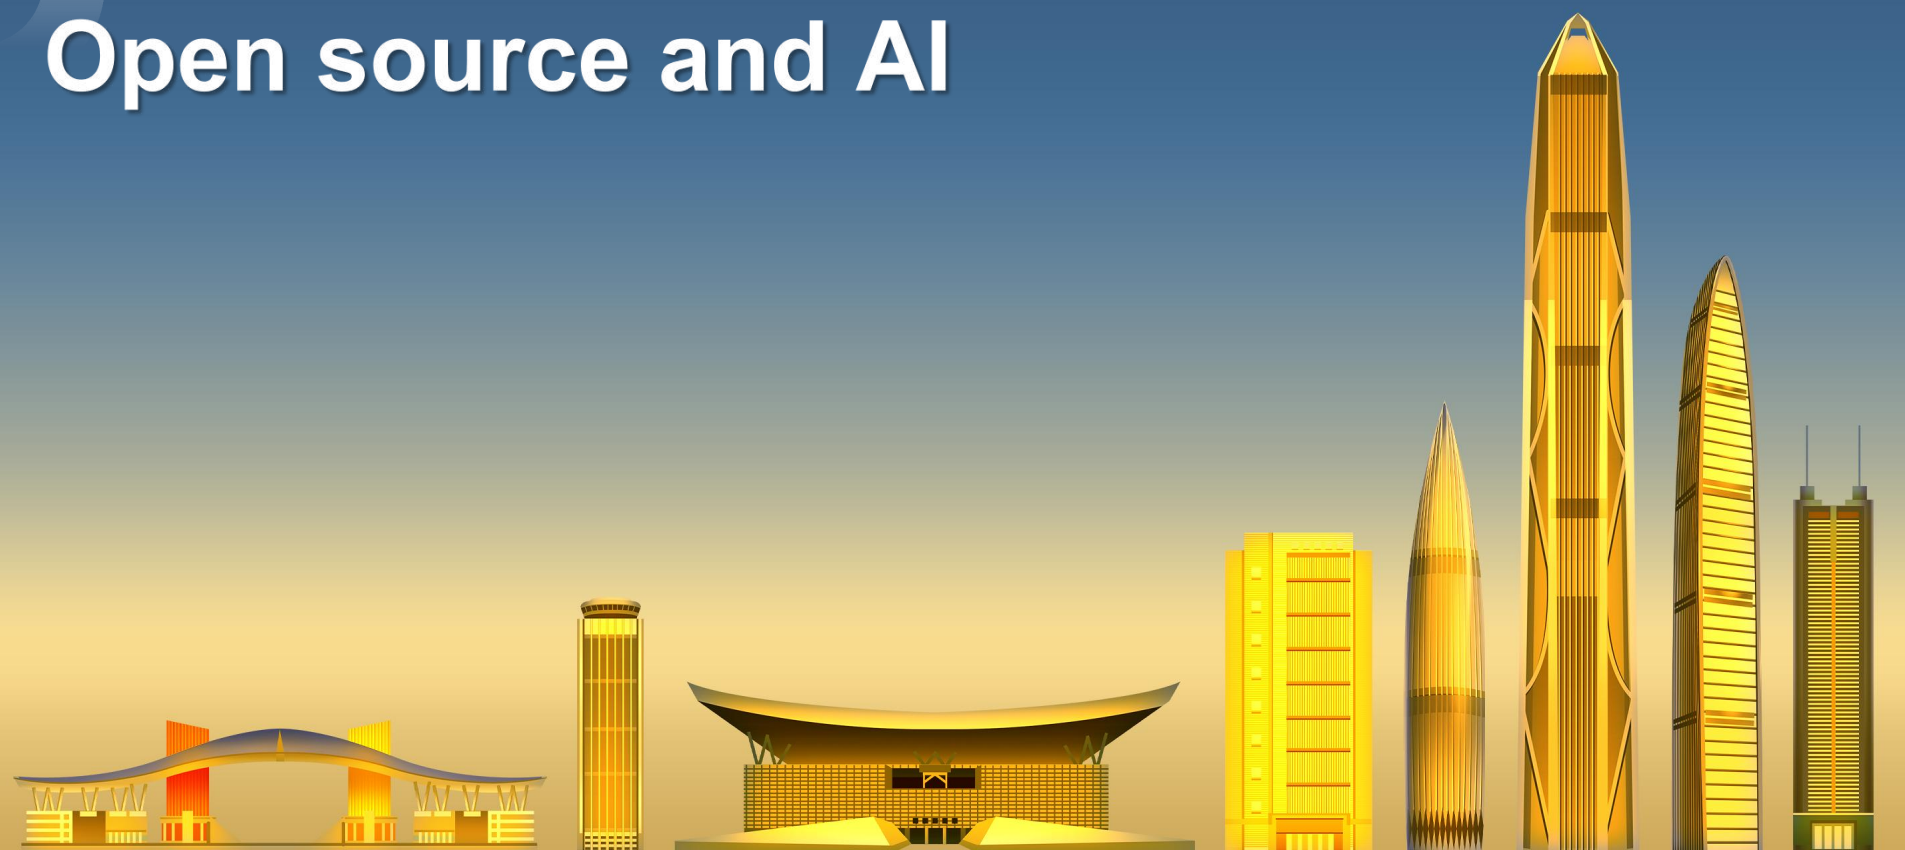

We have achieved fruitful results in open source standardization, carrying out standard development in open source governance, open source supply chain, SBOM and AI open source.

我们在开源领域标准化方面已取得丰硕成果，围绕开源治理、开源供应链、SBOM、AI 开源等方向开展标准研制工作。

03

Standards：Open source and AI

Adaptation Gap（适配缺口）

AI open source covers **new artifacts** such as large **model weights and training datasets**, and traditional open source licenses cannot accommodate their unique characteristics.
人工智能开源包含大模型权重、训练数据集等新型产出物，现有传统开源协议难以覆盖这类成果的独有特性。

Risk Management（风险管控）

The release of models and datasets may trigger risks including **copyright ownership disputes, privacy leakage and content safety**, which require standards for governance.
模型与数据集开放过程中易引发版权归属、个人隐私泄露、内容安全等风险，亟需标准予以规范约束。

Ecosystem Collaboration（生态协同）

Unified standards **clarify rights and obligations** of all parties, **reduce upstream and downstream collaboration costs**, and ensure the orderly and sustainable development of the AI open source ecosystem.
通过统一标准明晰各方权责，降低上下游协作成本，保障 AI 开源生态规范、有序、可持续发展。

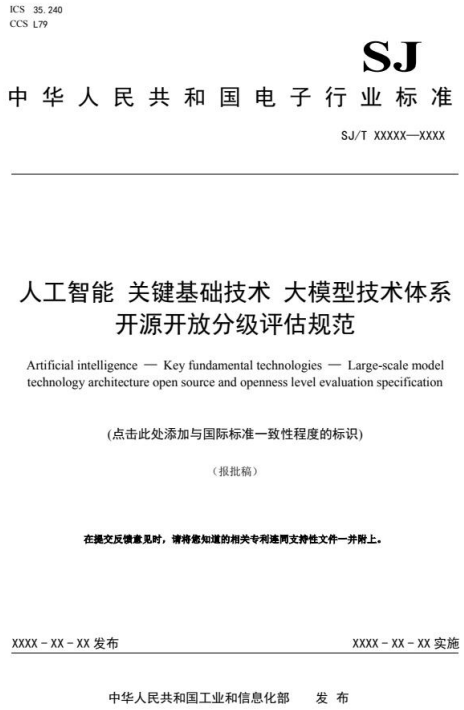

《Artificial intelligence — Key fundamental technologies — Large-scale model technology architecture open source and openness level evaluation specification》

《人工智能 关键基础技术 大模型技术体系开源开放分级评估规范》

Recently, the Ministry of Industry and Information Technology issued Announcement No. 22 of 2026, **officially releasing the industrial standard SJ/T 12304-2026**.

近期，工业和信息化部发布 2026 年第 22 号公告，正式发布 SJ/T 12304-2026《人工智能 关键基础技术 大模型技术体系开源开放分级评估规范》行业标准。该标准由中国电子技术标准化研究院牵头并归口，汇聚国内产学研多方单位共同研制。

3、Introduction of SJ/T 12304-2026

This standard establishes a five-level grading framework for the open-source openness of large model technology systems based on two core dimensions: completeness and openness.

本标准围绕完备性与开放性两大核心维度，构建了大模型技术体系开源开放的五级分级框架。

- This standard establishes a grading framework **with 67 indicators from two dimensions**: Completeness (L) and Openness (O).
- **Completeness** measures the availability and completeness of documents throughout the large model lifecycle, covering **32 indicators**.
- **Openness** evaluates the compatibility of large model assets (code, data, etc.) with open source licenses, covering **35 indicators**.

- 本标准明确了大模型技术体系开源开放分级框架与分级要求，从**完整性（L）、开放性（O）**两个维度构建了包含共**67**个指标的大模型技术体系开源开放分级框架。
- 其中，完整性用于衡量大模型全生命周期相关资料的公开完备水平，共包含**32**个指标；开放性用于衡量大模型资料（代码、数据等）对开源许可证的兼容适配能力，共包含**35**个指标。

完整性 L（资源完备度） \ 开放性 O（许可自由度）	O1（有限制）	O2（互惠）	O3（宽松）	O4（零义务）
L1 开放部署级	L1O1	L1O2	L1O3	L1O4
L2 模型理解级	L2O1	L2O2	L2O3	L2O4
L3 训练公开级	L3O1	L3O2	L3O3	L3O4
L4 模型验证级	L4O1	L4O2	L4O3	L4O4
L5 全链开源级	L5O1	L5O2	L5O3	L5O4

4、Completeness

Completeness adopts an incremental grading mode, where each level adds open materials on the basis of the previous level.

完整性维度采用逐级递增分级模式，每一级均在前一级基础上新增开放资料项。

Level	Completeness （完整性）
L1	**Baseline items:** Model weights（**模型权重**）； Model configuration files（**模型配置文件**）； Tokenizer files（**分词器文件**）； Inference scripts（**推理脚本**）； Inference environment instructions（**推理环境说明**）；
L2	**New additions:** Model principle description（**模型实现原理说明**）； Training process explanation（**训练过程说明**）； Evaluation results（**评测结果**）；
L3	**New additions:** Training code（**训练代码**）； Training data（**训练数据**）； Training environment instructions（**训练环境说明**）；
L4	**New additions:** Evaluation code（**评测代码**）； Evaluation data（**评测数据**）； Evaluation environment instructions（**评测环境说明**）；
L5	**New additions:** Data preprocessing scripts（**数据预处理脚本**）； Data cleaning scripts（**数据清洗脚本**）； Raw data description（**原始数据说明**）； Reproduction guidelines（**复现指导**）；

5、Openness

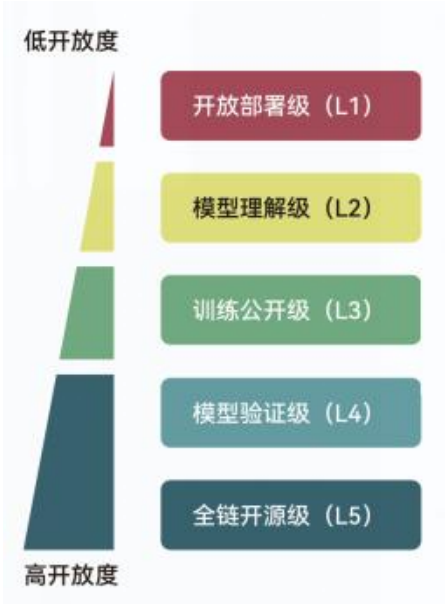

Openness covers three aspects: code license, data license and model license. A higher level indicates a higher degree of openness.

开放性维度涵盖代码许可证、数据许可证、模型许可证三个方面，等级越高代表开放程度越高。

Level	Openness			
	Code License	Data License	Model License	
			Sub-category	Restrictive Clauses（限制条款）
L1	Open Source Software License 开源软件许可证	Specify if sample data is attached; otherwise, mark as "—". 如随附样例数据则注明；否则“—”	L1O1	Prohibited from use in the improvement of other models（禁止用于改进其他模型）
				Mandatory prominent brand display（强制显著品牌展示）
				Commercial use prohibited（禁止商用）
				Commercial use restricted（限制商用）
				Geographic or national scope restrictions（地域/国家用途限制）
			L1O2	Derivatives shall be open-sourced under identical or compatible licenses（要求衍生物以相同或兼容许可证开源）
			L1O3	No substantial usage restrictions; closed-source retention or license replacement upon redistribution is allowed（无实质性使用限制）
			L1O4	Fully unrestricted for free use（无任何限制，可自由使用）
L2	If training-related code is disclosed, an open source software license is required; otherwise, mark as "—". 如披露训练相关代码则需为开源软件许可证；否则“—”	Specify if training-related samples/metadata are disclosed; otherwise, mark as "—". 如披露训练相关样例/元数据则注明；否则“—”	L2O1	Restrictive clauses identical to L1O1（同 L1O1）
			L2O2	Derivatives shall be open-sourced under identical or compatible licenses（要求衍生物以相同或兼容许可证开源）
			L2O3	No substantial usage restrictions; closed-source retention or license replacement upon redistribution is allowed（无实质性使用限制）
			L2O4	Fully unrestricted for free use（无任何限制，可自由使用）
L3	Open Source Software License 开源软件许可证	The license shall be clearly defined and authorize licensees to conduct model training. 需明确许可，且允许被授权者用于模型训练；	L3O1	Restrictive clauses identical to L1O1（同 L1O1）
			L3O2	Derivatives shall be open-sourced under identical or compatible licenses（要求衍生物以相同或兼容许可证开源）
			L3O3	No substantial usage restrictions; closed-source retention or license replacement upon redistribution is allowed（无实质性使用限制）
			L3O4	/
L4	Open Source Software License 开源软件许可证	The license shall be clearly defined and authorize licensees to conduct model testing. 需明确许可，且允许被授权者用于模型测试；	L4O1	Restrictive clauses identical to L1O1（同 L1O1）
			L4O2	Original license terms shall be inherited and publicly disclosed（要求继承原始许可条款并公开）
			L4O3	No substantial usage restrictions; closed-source retention or license replacement upon redistribution is allowed（无实质性使用限制）
			L4O4	/
L5	Open Source Software License 开源软件许可证	Specify if raw data samples/metadata are disclosed; otherwise, mark as "—". 如披露原始数据相关样例/元数据则注明；否则“—”	L5O1	Restrictive clauses identical to L1O1（同 L1O1）
			L5O2	Original license terms shall be inherited and publicly disclosed（要求继承原始许可条款并公开）
			L5O3	No substantial usage restrictions; closed-source retention or license replacement upon redistribution is allowed（无实质性使用限制）

7、AIBOM Standards

We carry out standard development for **Artificial Intelligence Bill of Materials (AIBOM)**, focusing on AI supply chain, aiming to address challenges including **insufficient information transparency, weak traceability and lack of security governance specifications** in the AI industry.
我们还开展人工智能物料清单（AIBOM）标准研制工作，聚焦 AI 供应链，旨在解决行业信息透明度不足、溯源能力薄弱、缺少安全管控规范等问题。

Evaluation： Mulan AI-OpenG

1、Evaluation Content

Evaluation Introduction

AI-OpenG
大 模 型 开 源 开 放 分 级 测 评

- **Evaluation Basis**:
《Artificial intelligence — Key fundamental technologies — Large-scalemodeltechnology architecture open source and openness level evaluation specification》

- **Evaluation Method:**
Tool-based testing + manual assessment
(工具化检测 + 人工评审)

- **Evaluation Content:**
Complete open-source materials of the large model provided by the tested party, including model weight files, configuration files, license compliance documents, etc.
(大模型完整开源资料，包含模型权重文件、配置文件、许可合规文档等。)

Evaluation Value

大模型技术体系开源开放分级
测评报告

- For model tested parties: Improve the completeness of model materials and meet compliance requirements.

面向模型被测方：完善模型资料完备性，满足合规管控要求。

- For model users: Support accurate model selection, and avoid security and compliance risks while matching business needs.

面向模型被测方：完善模型资料完备性，满足合规管控要求。

2、Advantages of Mulan AI-OpenG

Comparison Objects（对比对象）：Linux Foundation MOF / MOT、European OSAI Index、Stanford FMTI

Comparison Dimension（对比维度）	Mulan AI-OpenG	MOF / MOT	OSAI Index	Stanford FMTI
Core Objective（核心目标）	Evidence-based Open Source Openness Grading（证据化开源开放分级）	Openness Categorization（开放类别判断）	Multi-dimensional Openness Comparison（多维开放性比较）	Transparency Indicator Evaluation（透明度指标评估）
Grading Logic（分级组织逻辑）	Deployable → Understandable → Trainable → Verifiable → Reproducible（可部署→可理解→可训练→可验证→可复现）	Progressive by Completeness of Open Components（按开放组件完备度递进）	Recorded by Openness Item Dimensions（按开放项维度展开记录）	Itemized Scoring by Transparency Indicators（按透明度指标逐项打分）
Lifecycle Coverage Depth（生命周期覆盖深度）	●	◐	◐	◐
Distinguish Between Integrity and Openness（是否区分完整性与开放性）	●	◐	○	○
Evidence Traceability（证据可追溯性）	●	●	●	●
Capability to Characterize Restricted Openness（对限制性开放的刻画能力）	●	◐	◐	○
Ability to Express Improvement Path（是否能表达改进路径）	●	◐	○	○
Focus on Model Reproducibility Chain（是否能表达改进路径）	●	◐	○	○

Legend: ● Strong ◐ Medium ○ Weak

What distinguishes Mulan AI-OpenG is not merely judging whether a model is open, but grading models based on scenarios spanning from application to reproducibility.

3、Pilot Analysis——Hugging Face

China is represented in the highest-openness tier of the L5O3 list.

- **4** entries in likes ranking, **5** in downloads ranking
- Multimodal as key strength; **InternVL3.5** series takes 4 download slots
- Standout models from community & industry: **MiniCPM, Alibaba, InternLM**

在 L5O3 榜单的最高开放档位梯队中，中国位列其中。

- 点赞榜 4 项上榜、下载榜 5 项上榜
- 多模态为特色优势，InternVL3.5 系列占下载榜 4 席
- 社区、企业均产出标杆模型，MiniCPM、阿里、InternLM 系列位列榜单

3、Pilot Analysis——Hugging Face

China features prominently on the L4O3 list

- 4 entries each in likes and downloads rankings
- Chinese models take the top two download spots

中国在 L4O3 榜单表现亮眼

- 点赞、下载榜单各 4 项上榜
- 下载榜前两位均为中国模型

BAAI's bge-m3 leads both metrics

- 2,842 likes, 119 million cumulative downloads

BAAI 的 bge-m3 两项指标位居前列

- 2842 点赞，累计下载 1.19 亿次

- Chinese models cover diverse technical areas
- - Retrieval (bge-m3), code (Qwen2.5-Coder), multimodal (ERNIE, Ovis)
- - Contributions from non-profits, enterprises and open-source communities

中国模型技术领域多元

- 检索、代码、多模态方向均有代表
- 非营利机构、企业、开源社区均有贡献
